## The MeloYelo Advantage

All our NZ designed Melo Yelo '66 Series ebikes are equipped with quality name brand components: Bafang motors, Samsung battery cells, Shimano gears, Tektro brakes, Velo seats & grips and more. A substantial upgrade on our '66 Series is the torque sensor motor. The torque sensor offers the most natural feeling boost to your own leg power. All our bikes also come with a thumb throttle override so you are in complete control – especially noticeable when accelerating from start in hilly terrain.

You won't find torque sensors on other bikes in this price range.

The '66 Series includes a 4 amp charger versus the normal 2 amps, which means you can recharge your bike in half the time. All MeloYelo bikes carry a 2 year comprehensive warranty.

When you purchase a bike or conversion kit from MeloYelo, 100% of our net proceeds go to [EVoloccity](#) a registered charity focused on education that accelerates adoption of electric transport solutions for the benefit of our environment and our economy.
