The MeloYelo Advantage

We are obsessed with delivering quality ebikes at an affordable price. Quality begins with the componentry we select: Samsung battery cells, Shimano gears, Tektro brakes, upgraded Velo seats (think extra comfort), upgraded LED lights (think improved visibility), Bafang motors, Kenda tyres, 4Amp chargers (think half the charging time) ... all selected by us. But, we don't stop there. We contract with an independent company to inspect all of our componentry prior to assembly, and all of our bikes after assembly and before shipping, to ensure that what we're getting is up to the standards we expect.

Then, once the bikes have arrived in NZ, they are inspected and tested again ahead of delivery.

You might expect that with such an obsession on quality, our bikes would cost \$3000 or more. Yet because of our unique distribution model, plus the fact that we're a brand of the registered charity EVelocity, with proceeds from our electric bike sales supporting EVelocity's electric vehicle programme in schools, we're able to sell our bikes for under \$2500. Which means you get the emotional reward of supporting a good cause, plus the financial reward of a great price.
