“

THE BAFANG MOTOR HAS EXCELLENT HILL CLIMBING TORQUE AND POWER AND IS VERY EASY TO PEDAL WHEN THE MOTOR IS TURNED OFF.

CONSUMER REPORTS NZ, OCT 2019.

”

MELOYELO REGULARLY COMPARES EACH OF ITS MODELS TO OTHER EBIKES.

Here's what we find:

Other ebikes in a similar price range often have **off-brand motors**, not one of the 5 brands reviewed by Consumer Reports

Our sprung **memory foam saddle** is the **most comfortable** in its class

The **torque** (turning force) of MeloYelo's Bafang motors is often **significantly greater**

Our bikes come **standard with mudguards, lights and carrier**. Many others do not

Our step-through models offer those with mobility issues **easier mounting and dismounting**

THERE'S A MELOYELO

E-BIKE FOR EVERYONE!
