just mad about
E-BIKES

DIFFERENT COMPANY

DIFFERENT EBIKES

**The unique benefits of dealing
with MeloYelo. Plus the unique
features of each MeloYelo ebike.**

DIFFERENT COMPANY

Since it's founding in 2016, kiwi-owned MeloYelo has operated in a very different way from other ebike companies.

OUR WARRANTY IS DIFFERENT.

While other ebike companies typically offer a 1 year warranty on mechanical parts and a 2 year warranty on electrical parts, **MeloYelo offers a 3 year warranty** on mechanical and electrical components, providing you adhere to our service schedule. That's how confident we are in the quality of our components.

OUR AGENT EXPERIENCE IS DIFFERENT.

Most of our agents operate from their homes. They have received extensive training on ebikes in general, and rather than pushing a particular product that may or may not suit your needs, they take the time to understand you and what you're looking for. Even if you haven't ridden a bike in years, we'll gently work with you, taking as much time as necessary to get your confidence up and most importantly, to get that e-bike smile on your face.

OUR TEST RIDE EXPERIENCE IS DIFFERENT.

Most bike shops are located in busy urban areas, and if you do get offered a test ride, it will be around the parking lot. MeloYelo agents offer long test rides, away from busy streets, and if you want, they will even ride along with you.

OUR CUSTOMER COMMUNITY IS DIFFERENT.

MeloYelo customers love to meet each other, enjoy group rides together, and share their experiences together. We make this possible through a private Facebook community that only our customers can join.

THE VALUE WE OFFER IS DIFFERENT.

MeloYelo ebikes come with a bunch of useful extras, at no extra cost. Mudguards. Lights. A childseat-ready carrier. A derailleur protector. Plus, we offer:

- A free custom-fitting service. Our agent will fit the bike to you;
- A free service check, 6 months following your purchase;
- A three year warranty on both mechanical and electrical components, providing you adhere to our service schedule. (Other companies offer 1 year mechanical warranty; 2 year electrical warranty)

OUR SERVICE AFTER THE SALE IS DIFFERENT.

- Nationwide service network
- 24/7 call centre
- Spare parts available, right here in NZ. So, you won't have to wait for months to get your bike up and running again if you do experience a problem.

OUR COMMUNITY SERVICE IS DIFFERENT.

MeloYelo's founder was also the founder of EVelocity, a programme that runs in over 100 schools around NZ. Teams of students design, build and compete in electric vehicles, learning valuable engineering skills as well as an understanding about the benefits of electric vehicles and how they work.

DIFFERENT BIKES

Notice the wide range of interesting colour options. And, notice too that MeloYelo offers 5 different models with step-through frames, plus one traditional mountain bike-style model. There's a bike for almost every need.

TOWNEE 2.0

COMFORT. BALANCE. STYLE.

The Townee is ideal for those who will be doing most of their riding around town, though it is also suitable for light off-road trails.

Frame size	Medium
Wheel size	26"
Battery size	504Wh
Speed sensor	Cadence sensor

THE DIFFERENCE

- The Townee 2.0 comes with a chain guard to protect your clothing, the best saddle in class, and swept-back handlebars for the most comfortable upright seating position. Plus, our handlebar stem is more adjustable than others so that the ultimate riding position for each rider can be customised. That's different!
- The Townee has a thumb throttle which delivers full power from 0km/hour, giving you a confident burst of power when you need a little extra. That's different!
- The Townee comes with mudguards, lights and carrier, at no extra cost. That's different!

TOWN'N TRAIL

THE BEST OF BOTH WORLDS

Because it's a hub-drive bike, the Town'nTrail is less expensive than our other models. But don't be fooled. For many ebike riders, this is all the bike they will ever need. It has our large, 630 watt-hour battery, torque sensor and hydraulic brakes and has tackled trails such as the Pureora Timber Trail, Alps to Ocean, and Dunstan.

Frame/ Wheel size	Small/26" Medium/27.5" Large/27.5"
Battery size	630Wh
Speed sensor	Torque sensor

THE DIFFERENCE

- The Town'nTrail comes with a large, 630 watt-hour battery, allowing you to cover more distance on your rides without suffering from range anxiety. That's different!
- It has a thumb throttle you can use for short bursts of extra power. That's different!
- The Town'nTrail comes with lights, mudguards and a carrier already fitted, at no extra charge. That's different!

TRANZIT MD

MID-DRIVE HEAD TURNER

For those who may be getting back into cycling after a multi-year hiatus; for those who are unable to apply a lot of pedal pressure with their legs; for those who are going to be riding mostly around town or on wine trails, rail trails, beach and lakeside trails, the Transit MD fits the bill. It has high torque (80 newton-metres of turning force), it is a cadence sensor system (versus torque sensor), meaning that once you're going, it requires less pedal pressure to keep it going), and its swept-back handlebars deliver an upright seating position that some riders prefer.

Frame size	Medium
Wheel size	26"
Battery size	630Wh
Speed sensor	Cadence sensor

THE DIFFERENCE

- The Tranzit comes with a large, 630 watt-hour battery that let's you enjoy longer rides without suffering from range anxiety. That's different!
- The Tranzit is super-easy to pedal. It doesn't require as much leg energy as similar models from other brands. That's different!
- Consumer NZ said the bike has very good slow speed balance and is excellent on rough surfaces. That's different!
- The Tranzit comes fully equipped with mudguards, lights and carrier, at no extra cost. That's different!

TRAVERSE MD

HIGH TORQUE TRAIL BIKE

If you're going to be tackling longer, steeper, multi-day trail rides, then the answer is simple: Choose the Traverse MD or its step-through sibling, the Ascent MD. Both of these bikes are equipped with the Bafang M400 mid-drive motor which offers the best combinations of torque (80 newton-metres of turning force) and peak power (792 watts of peak power). They also come with 630 watt-hour batteries that are significantly larger than most batteries on competitors' ebikes.

Frame/ Wheel size	Medium/27.5" Large/27.5"
Battery size	630Wh
Speed sensor	Torque sensor
Nm torque	80Nm

THE DIFFERENCE

- The Traverse has proven robust in the toughest of NZ conditions, such as the 3000km Tour Aotearoa. That's different!
- The Traverse has a thumb throttle you can use for short bursts of extra power. (You can activate it once you've reached 6km/hour). That's different!
- The Traverse comes with a large, 630 watt-hour battery, giving you confidence to tackle longer rides without suffering from range anxiety. That's different!
- The Traverse comes standard with mudguards, lights and carrier, at no extra cost. That's different!
- The motor on the Traverse received an excellent review on Consumer Reports NZ and was one of only two motors that had no negatives. That's different!

ASCENT MD

STEP THROUGH TRAIL BIKE

If you're going to be tackling longer, steeper, multi-day trail rides, and you want a step-through frame, then the answer is simple: Choose the Ascent MD. The Ascent is equipped with the Bafang M400 mid-drive motor which offers the best combinations of torque (80 newton-metres of turning force) and peak power (792 watts of peak power). The Ascent also comes with a 630 watt-hour battery that is typically significantly larger than batteries on competitors' ebikes.

Frame/ Wheel size	Small/26" Medium/27.5" Large/27.5"
Battery size	630Wh
Speed sensor	Torque sensor
Nm torque	80Nm

THE DIFFERENCE

- Consumer NZ praised the motor on this bike for excellent hill-climbing torque and power, smooth gear changes, and excellent responsiveness when you start and stop pedaling. That's different!
- The Ascent comes with a gear sensor which lengthens the life of your drivetrain by eliminating excessive power when you're shifting gears. That's different!
- The Ascent has a thumb throttle you can use for short bursts of extra power. (You can activate it from 6km/hour.) That's different!
- The Ascent has a large, 630 watt-hour battery meaning you can tackle longer rides without suffering from range anxiety. That's different.

SUPERLITE

WEIGHING IN AT JUST 22KGS

If bike weight is of paramount importance to you, then consider the Superlite. It weighs in at just 22kgs including the battery (19kg with battery removed/easy to remove). This weight also includes the carrier, mudguards and lights. Many other brands don't include these when specifying the weight of their bikes. This puts it in the same weight league as carbon fibre bikes. Yet it is equipped with high-spec componentry for tackling trails up to grade 3.

Frame/ Wheel size	Small/26" Medium/27.5" Large/27.5"
Battery size	504Wh or 630Wh
Speed sensor	Torque sensor
Nm torque	80Nm

THE DIFFERENCE

- It's made from aircraft grade aluminium (think: Strong) yet weighs no more than a carbon fibre ebike. That's different!
- Its front suspension is air suspension, giving it a totally different (and better) feel than other bikes with coil/spring suspension. That's different!
- It has a thumb throttle you can use for short bursts of extra power. That's different!
- It's now available without the top bar over the battery. It's just as strong, but easier to step through. That's different!

my

HOW TO FIND OUT WHICH E-BIKE IS RIGHT FOR YOU?

Whether you're considering a MeloYelo or some other brand, MeloYelo believes that the most important thing you can do is test ride different models until you find the one that feels best for you.

SO, HOW CAN YOU TEST-RIDE MELOYELO E-BIKES?

Because most of our agents work from home, you need to make an appointment. The good news is, we've made this super-easy. Just go to www.meloyelo.nz, click on the test ride button, and submit your test ride request. We will then send your enquiry to our agent nearest you, and they'll get in touch with you to arrange a convenient time.

REST ASSURED. NO HIGH-PRESSURE SALES TACTICS.

We like to say there's more pressure in our tyres than there is in our agents. Chances are, they'll sit down with you over a cuppa for a friendly chat.
